1. Dashboard (Authentication Page)

- Purpose: Acts as the entry point for users to log in.
- Authentication: Uses Clerk for secure and seamless authentication.
- Flow:
    - Upon visiting the dashboard, users are prompted to log in or sign up.
    - Once authenticated, they are automatically redirected to the Ingredients Inventory Page.

2. Ingredients Inventory Page

- Purpose: Allows users to manage ingredients from their pantry.
- Key Features:
    - Add Ingredients: Users can add ingredients and specify expiration dates.
    - Filter System: View ingredients by freshness:
        - Fresh
        - Close to Expiring
        - Expired
    - Smart Disposal:
        - Users can click a garbage icon on an ingredient.
        - The app will suggest disposal methods (e.g., composting, recycling, or local drop-offs).

3. Recipe Page

- Purpose: Enables users to discover and explore recipes in two ways.
- Tabs:
    - Search Tab:
        - Search for any recipe by name or keyword.
    - Filtered Recipes Tab:
        - Automatically filters and displays recipes based on the ingredients currently available in the user's pantry.
        - Helps reduce waste by encouraging the use of existing items.

4. Donation Page

- Purpose: Helps users donate unused food to local food banks.
- Location-Based Services:
    - Uses the user's current location.
    - Displays and pins the 10 nearest food banks on a map.
    - Encourages socially responsible actions by promoting food donation over disposal.
